

# Tina's garden

Laminate this sheet and place or draw jewels on the garden rows to discover the 5 times tables.

$$5 \times 1 = \square \quad 5 \times 2 = \square \quad 5 \times 3 = \square \quad 5 \times 4 = \square \quad 5 \times 5 = \square$$

$$5 \times 6 = \square \quad 5 \times 7 = \square \quad 5 \times 8 = \square \quad 5 \times 9 = \square \quad 5 \times 10 = \square$$

Can you draw 5x10 to make it faster to figure out?
